## Sensex to Cross 1,05,000 By Dec 2025?

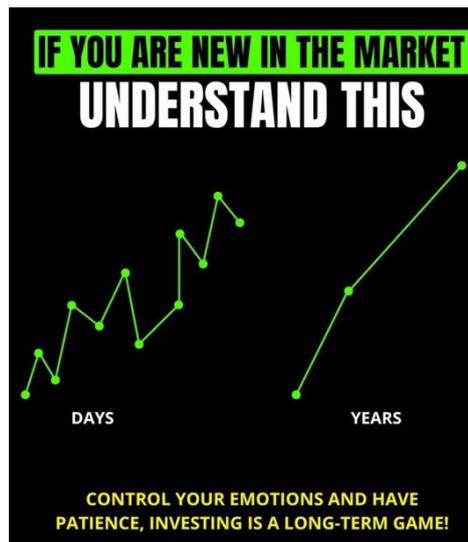

Despite the recent uncertainties and fall in the stock market for last 5 Months. Despite the challenges like Trade wars, Tariff Rise, Dollar Strengthening will Sensex Hit 1,05,000 by Dec 2025?

Morgan Stanley have not changed their guidance despite all the above challenges in the world of Stock Investing. They feel there is 30% probability of Sensex hitting 1,05,000 by Dec 2025.

Morgan Stanley Analysts and Economists led by Ridhan Desai, mentioned that Indian Earnings are turning up positive and India is a stock picking market, where the valuations are attractive after covid pandemic levels.

India's low share of marketing exports and high services exports are saviour in the world of High Tariffs. RBI Rate Cuts, Strong Budget spending with Tax exemptions on this budget are positive developments since early Feb 2025 are the sentiment indicator and making India is in strong buying territory.

What can derail this bull run up will be Trade and Tariff policy from US, USD Vs Indian Rupee Movements, and any other Geo Political Interventions.

Happy Investing!

## Mutual Fund Corner

### Edelweiss Balanced Advantage Fund

The fund dynamically changes asset allocation across equity, debt, cash and derivatives (including hedges), based on valuation cycles

The Fund manager will increase the exposure to equity when market valuations are attractive and will prune the equity exposure by increasing cash or debt exposure and/or through hedging when equity markets get expensive or experience volatility.

Allocation to equities and debt & money market instruments can be in the range of 0% - 100%.

Asset allocation is determined based on proprietary model combining valuation parameters like P/E & P/B along with the yield gap to determine net equity allocation.

The model may use qualitative overlay of fund management team from time to time to arrive at final equity allocation
