Markets with lower price-to-earnings ratio are more attractive or better bargains than those valued higher. Indian equities have been widely considered to be the world's most expensive ones. The latest bout of sell-off particularly by foreign portfolio investors may have prices more attractive than they have been over the last year.

Markets with lower price-to-earnings ratio are more attractive or better bargains than those valued higher.

“We are at 19 times earnings on the Nifty, and we have corrected 12-13% from the top. If we assume 18 times earnings as the base, there could be another 5-6% downside left on the Nifty with the current trending.

There is no roof in Bull Market and there is no floor in Bear Market, Markets go irrational in short term and always catch up to earnings and averages in long term.

Weekly Market Pulse

Domestic equity markets fell for the third consecutive week as key benchmark indices BSE Sensex and Nifty 50 fell 2.81% and 2.94%, respectively. The fall was broad-based as the midcap segment and the small-cap segment both closed the week in red.

Domestic equity markets fell amid heightened trade tensions around the globe. Investors' sentiment was negatively impacted after the U.S. President has threatened to impose a 25% tariff on imports from the European Union.

Losses were extended after China vowed to take "all necessary countermeasures and defend its legitimate rights and interests" following the U.S. President's announcement of an additional 10% tariff on Chinese imports, intensifying the brewing trade war between the world's two largest economies.

On the BSE sectoral front, BSE IT fell 7.76% due to the impact of the U.S. President's latest announcement on tariffs that have triggered fresh worries of a trade war and a slowdown in the U.S. economy.

BSE Bankex experienced the least decline among the sectors, with a loss of 1.55%

Mutual Fund Corner

Axis Balanced Advantage Fund

Axis Balanced Advantage Fund

(An open ended dynamic asset allocation fund)

A dynamic asset allocation can help investors overcome volatility in Investors Portfolio by dynamically adjusting the Equity Allocation.

Axis Balanced Advantage fund follows a 5-factor approach to determine equity exposure while rebalancing.

All 5 variables are given importance while computing the net long exposure. While few factors are quantifiable like valuation, earnings momentum; there are factors like geo-political scenarios which consider the events and market expectations that impact the trend in the stock market.

The fund endeavours to generate capital appreciation via equity exposure and to generate income by investing in Fixed Income securities

Suitable for Investors looking for a solution which dynamically adjusts equity exposure and to participate decently in market rallies

The Fund is ideal for investors who have an investment horizon of 5 years.
